PROYECTO VALLE DE CACAULAPA CATALOG FORM

DATE: 19 July 2005

LOT NUMBER: ^{PVN} 202 598 AA / 004

SUBSTANCE: Ceramic

OBJECT: Worked sherd

CATALOG #: AA / 004 - 3

MULTIPLES? maybe see current DRAWN BY: 66

PASTE GROUP (for ceramics):

EXCAVATOR:

CATALOGED BY: 66

MAXIMUM--HGT/LENGTH: 3 cm WIDTH: 3.5 cm THICKNESS:

VERBAL DESCRIPTION: This worked sherd is intact: y - n. (intact chump)

If no, approximately what percentage is preserved (give a number):

The shape of this object is approximately: triangular - square - rectangular - oval - tear-drop - other (describe):

A scribed/lightly incised line demarcating the circumference is visible: y - n

The margin/edge was chipped to form the item: y - n (maybe, all ground flat now)

The margin/edge was deliberately ground to smooth it: y - n

The margin/edge is smoothed from use: y - n

There is other use wear visible: y - n

Trace the item on the reverse, both frontal view and profile, and show where there is use.

Describe the use: ① smoothing + use wear

② more pronounced - that is used.

① + ② are definitely point related use

The type-variety from which this was made is: PIT

Comments: AA / 004 - 3 are definitely from the same vessel; however, erosion has gotten the edge so bad I can't be sure whether they are multiples or just 2 worked sherds from the same vessel. The use wear seems to be where they would go together so I think they were two sep pieces, though they def. were multiples at one point in time.

(int facing)
